

PrintSolutions

- offering more than a name

Kieran O'Sullivan and Ian Scouler

Print Solutions may be a new name in the industry, but with over 70 years of experience, the Dublin-based company continues to provide one of the most comprehensive range of products to wide format digital printers.

Print Solutions, formerly known as D'O Sullivan Print Supplies, is solely focused on the distribution of consumables to wide format digital printers, screen printers and sign makers.

Based in a 40,000 Sq ft facility on the Naas Road, Print solutions can offer same-day delivery in the Dublin area and next-day delivery country wide.

In recent years Print solutions has invested time and resources sourcing products from south East Asia to complement the existing extensive portfolio of products from major Western suppliers.

The objective is to offer customers quality product and extremely competitive prices. In the current environment with businesses trying to squeeze cost out of their daily operations, the phrase 'buying right' has never been so important.

Display Products

Most recently, Print Solutions have added a range of display products including five different roll-ups from economical low end to top end deluxe, pop-ups, click frames from A4 to A0, Edge lite light boxes, A boards and wind talkers.

Traditionally, most of these products have come from South East Asia through UK or European stockists. Print Solutions philosophy is to cut out the unnecessary links in the supply chain, bringing products from

factory gates to customers with no agents or middle-men adding to the costs.

Recession Busters

With the promise of alleviating customers' costs, Print Solutions recently launched its Recession Busters portfolio of products.

Offering substantial savings on market prices, there is an array of products under this offering including display products mentioned above banner materials, laminated and coated front lite, back lite and mesh at prices they believe is currently the best on the market.

They have also added a Monomeric self adhesive vinyl's, contra vision, reflective materials and composite aluminum 'which is very well priced and suitable for flat-bed printing.'

Extensive warehouse facility

However, the Recession Busters are just a small part of the overall range of products, of which most is branded from Europe or the USA such as Avery Dennison and Foamalite. These include a range of materials for wide-format solvent, eco-solvent and UV flat bed printers. This portfolio comprises of self-adhesives, laminates, films, textiles, inks, banner, paper, free foam, foam centered, fluted polyprop, rigid pvc, polystyrene, composite aluminum, third party ink, click frames, roll ups, pop ups and light boxes.
